

WHAT IS CLAIMED IS:

- 1 1. A portable terminal device including a light emitting section
2 in a case thereof, comprising:
3 a space section formed in the case; and
4 a window section formed in a surface of the case, through
5 which light emitted from the light emitting section is
6 transmitted, wherein
7 the light emitting section has a light emitting surface
8 directed in a direction along a surface of a wiring board located
9 in the case.
- 1 2. The portable terminal device according to claim 1, wherein
2 the light emitting section is attached to the wiring board.
- 1 3. The portable terminal device according to claim 1, wherein
2 the space section is a flat space.
- 1 4. The portable terminal device according to claim 1, wherein
2 the light emitting section is disposed in the space
3 section.
- 1 5. The portable terminal device according to claim 1, wherein
2 the light emitting section emits at least any one of red,
3 green, and blue light beams.
- 1 6. The portable terminal device according to claim 1, wherein
2 the light emitting section is a light emitting diode of

3 side emitting type.

1 7. The portable terminal device according to claim 1, wherein
2 the light emitting section is a light emitting diode of
3 surface emitting type.

1 8. The portable terminal device according to claim 1, wherein
2 the window section is translucent.

1 9. The portable terminal device according to claim 1, wherein
2 the window section is creamy white.

1 10. The portable terminal device according to claim 1, wherein
2 the light emitting section emits light when a call arrives
3 at the portable terminal device.
